

State-owned Corporation of Arzaq A Source of Well-Being for the People

The economic development of a country and the well-being of its people can be ensured through an organized food supply system. Food is not only essential for human survival but also forms the foundation of a nation's economic and social stability.

State-owned Corporation of Arzaq, one of the key institutions in food provision, distribution, and management, plays a vital role in meeting public needs, stabilizing markets, and supporting national economic growth.

According to its strategic plans, the company is responsible for providing essential food products not only to governmental and non-governmental organizations but also to the general public, at fair prices and on time.

The activities of **State-owned Corporation of Arzaq** are not only for short-term benefit but also lay the foundation for the well-being and survival of future generations.

Occasionally, market conditions in the country may become tense, with prices rising due to hoarding and instability. **State-owned Corporation of Arzaq** is responsible for cooperating with sectoral institutions to control prices and supply stored goods to the market at affordable rates.

Economically, **State-owned Corporation of Arzaq** creates a reliable market for regional farmers and producers, enabling their products to grow and reducing dependence on imports. Supporting local products and production contributes to economic stability and self-sufficiency.

Furthermore, the company promotes economic stability to protect citizens from financial risks. **State-owned Corporation of Arzaq** also provides employment opportunities for the poor and vulnerable through the storage, transport, and distribution of food, benefiting thousands of people.

With continued progress in its operations, **State-owned Corporation of Arzaq** will help Afghanistan join the ranks of advanced nations, reduce unemployment, and improve the economic conditions of its people. **Inshallah.**
